

**USA Compression Partners, LP**  
2021 J.P. Morgan Global High Yield & Leveraged  
Finance Conference  
March 2-3, 2021

# Disclaimer

---

This presentation contains forward-looking statements relating to the operations of USA Compression Partners, LP (the “Partnership”) that are based on management’s current expectations, estimates and projections about its operations. You can identify many of these forward-looking statements by words such as “believe,” “expect,” “intend,” “project,” “anticipate,” “estimate,” “continue,” “if,” “outlook,” “will,” “could,” “should,” or similar words or the negatives thereof. You should consider these statements carefully because they discuss our plans, targets, strategies, prospects and expectations concerning our business, operating results, financial condition, our ability to make distributions and other similar matters. These statements are not guarantees of future performance and are subject to certain risks, uncertainties and other factors, some of which are beyond our control and are difficult to predict. These include risks relating to changes in general economic conditions and changes in economic conditions of the crude oil and natural gas industries specifically, changes in the long-term supply of and demand for natural gas and crude oil, actions taken by our customers, competitors and third-party operators, our ability to realize the anticipated benefits of acquisitions, competitive conditions in our industry, the severity and duration of world health events and the factors set forth under the heading “Risk Factors” or included elsewhere that are incorporated by reference herein from our Annual Report on Form 10-K for the year ended December 31, 2020 filed with the Securities and Exchange Commission, and if applicable, our Quarterly Reports on Form 10-Q and our Current Reports on Form 8-K. As a result of such risks and others, our business, financial condition and results of operations could differ materially from what is expressed or forecasted in such forward-looking statements. Before you invest in our common units, you should be aware of such risks, and you should not place undue reliance on these forward-looking statements. Any forward-looking statement made by us in this presentation speaks only as of the date of this presentation. Unpredictable or unknown factors not discussed herein could also have material adverse effects on forward-looking statements. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

# Important Note Regarding Non-Predecessor Information

---

On April 2, 2018, the Partnership consummated the acquisition of CDM Resource Management LLC and CDM Environmental & Technical Services LLC, which together represent the CDM Compression Business (the “USA Compression Predecessor”), from Energy Transfer, and other related transactions (collectively, the “Transactions”). Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. Therefore, the historical consolidated financial statements of the Partnership are comprised of the balance sheet and statement of operations of the USA Compression Predecessor as of and for periods prior to April 2, 2018. The historical consolidated financial statements of the Partnership are also comprised of the consolidated balance sheet and statement of operations of the Partnership, which includes the USA Compression Predecessor, as of and for all periods subsequent to April 2, 2018. The information shown in this presentation under the heading “Pre-CDM Acquisition Non-Predecessor” represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership for financial reporting purposes, for periods prior to the Transactions and is presented for illustrative purposes only. Such information does not reflect the Partnership’s historical results of operations and is not indicative of the results of operations of the Partnership’s predecessor, the USA Compression Predecessor, for such periods.

# USAC Overview

---

# USAC Overview

## Large Horsepower Strategy Critical for Domestic Natural Gas Infrastructure

### Business Snapshot

- USAC provides compression services across a geographically–diversified operating area
- 22+ year history with primary focus on large horsepower (1,000 HP+) applications
- “Southwest Airlines” standardized business model
- Focus areas: Permian/Delaware; Marcellus/Utica; Mid-Continent/SCOOP/STACK; S. Texas; E. Texas; Louisiana; Rockies
- Active Fleet: 3.0mm Horsepower
  - >70% is greater than 1,000 HP
- Average Q4 2020 Utilization ~83%
- ~750 employees

### USAC Market Statistics

- Public since 1/2013 (NYSE: USAC)
- Current Unit Price: \$14.56
- Avg. Daily Trading Volume: ~225,000 units
- IDRs Eliminated

(\$ in billions)	
LP Equity Value	\$1.4 billion
Preferred Equity	0.5 billion
ABL	0.5 billion
Sr. Notes	<u>1.5 billion</u>
Total Long-Term Debt	1.9 billion
<b>Enterprise Value</b>	<b>\$3.9 billion</b>

*Note: Market data as of February 25, 2021. Financial and operational data as of December 31, 2020.*

# Q4 2020 Recap

---

## Solid Conclusion to 2020

### Operational Update

- Q4 2020 fleet HP of 3.7 million / average revenue generating HP of 3.0 million
- Q4 2020 average horsepower utilization of 83%
- Quote activity continues to pick up; customer sentiment improving
- ~7,500 large HP delivered in Q4 2020
- Q4 Growth Capex: \$10.9mm (down 30% from Q3 2020)

### Financial Update

- Q4 reflected stability of USAC's business; utilization & pricing moves have moderated
  - Adjusted EBITDA of \$98mm
  - Distributable Cash Flow ("DCF") of \$50mm
- Q4 adjusted gross margin percentage of 68.4%, Adjusted EBITDA margin of 62.1%
- Common unit distribution of \$0.525 for Q4; DCF coverage of 0.99x

### 2021 Guidance

- Introduced full-year 2021 guidance:
  - Adjusted EBITDA: \$385mm – \$405mm
  - DCF: \$193mm – \$213mm

*Q4 2020 performance highlighted business stabilization; still work to do, but cautiously optimistic the worst is behind us*

# USAC Operates Critical Assets with Positive Fundamentals

## Natural Gas Has Proven Itself as a Long-Term Fuel; Compression is Critical!

### Supportive Macro: Gas Isn't Going Anywhere

- Bullish on demand for natural gas, both in US and globally
- LNG exports, petchem feedstock and power gen driving continued gas usage
- Natural gas demand/production expected to increase through 2050 <sup>(1)</sup>

### High Quality Assets in Right Places with Strong Customers

- New vintage, standardized fleet focused on high quality CAT/Ariel machines
- Geographic diversity, but significant density where the gas is: Permian/Delaware & Northeast
- Strong counterparties – active customers (major oil & gas, large independent E&Ps, midstream)

### Established Company with History of Stability

- Providing large horsepower compression services for >22 years
- Performance throughout price cycles; no direct commodity exposure
- Stable distribution history: >\$1 billion returned since IPO

*Compression is a “must-have” part of the natural gas value chain: with natural gas playing a critical role as a transition fuel to the future will come increasing requirements for compression*

1. U.S. Energy Information Administration: Annual Energy Outlook 2021.

# Why Focus on Midstream Compression?

## Operational / Cash Flow Stability with Strong Counterparties

	Wellhead (Gas & Oil)	Midstream	Downstream
Uses	Gas Lift Gas Reinjection	Regional Gathering Central Delivery Point Processing Plants	Interstate Pipelines Trunkline Gathering Gas Storage
Customer Base	Broad customer base	Typically larger operators	Typically owner-operators; Very large operators, integrated midstreams
Gas Volumes / Pressures	Lower	Medium-to-High	Higher
Compression Required	Small HP	Large-to-Extra Large	Larger-to-Extra Large (often turbines)
Stability	Dependent on commodity prices	Infrastructure-based; Longer-term	Permanent installations
Barriers to Entry/Exit	Non-existent; commodity service offering	Select group of operators; costly to install/de-mobilize	Integrated with pipeline systems as part of the jurisdictional rate base

USAC's focus on midstream applications results in more stability throughout commodity price cycles

# USAC Customer Overview

## Top 20 Customers: Diverse Counterparties & Long-Term Relationships

Customer	% of Rev <sup>(1)</sup>	Length of relationship	Total HP	Customer	% of Rev <sup>(1)</sup>	Length of relationship	Total HP
Independent Public E&P	8%	> 10 years	299K	Independent Public E&P	2%	> 10 Years	39K
Major O&G	4%	> 5 years	88K	Private Midstream	2%	> 5 Years	60K
Large Private E&P	4%	> 10 years	115K	Independent Public E&P	2%	> 5 Years	49K
Private Midstream	3%	< 5 Years	118K	Independent Public E&P	2%	> 10 Years	20K
Independent Public E&P	3%	< 5 Years	89K	Independent Public E&P	2%	> 10 Years	51K
Major O&G	3%	> 10 Years	155K	Independent Public E&P	2%	> 5 Years	73K
Midstream Unit of Public Utility	3%	> 5 Years	145K	Independent Public E&P	1%	> 5 Years	37K
Private Midstream	2%	< 5 Years	79K	Independent Public E&P	1%	< 5 Years	43K
Private Midstream	2%	> 5 Years	72K	Independent Public E&P	1%	> 10 Years	40K
Large Public MLP	2%	> 10 Years	41K	Independent Public E&P	1%	< 5 Years	29K
<b>USAC #1-10</b>	<b>35%</b>		<b>1,200K</b>	<b>USAC #11-20</b>	<b>14%</b>		<b>440K</b>

- USAC standalone has historically had very little bad debt write-offs; in fact, over the last 16 years, USAC has written off only ~\$3.0 million in bad debts
  - Equates to 0.08% of total billings (~\$3.8 billion) over same period <sup>(2)</sup>

1. Represents recurring revenues for the 12 months ended December 31, 2020.

2. Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above for USAC represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.

# Business Model Allows for Prudent Capital Spending.....

## Historical Balance Between Capital Spending and Cash Flow Stability

- Large HP focus ideally suited for growth and stability
- Assets provide growth based on marketplace demands
- Ability to rein in spending and operate for stable cash flow when market softens
- Largely agnostic to commodity prices; tied more to overall production of (and demand for) natural gas

1. Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above under the heading "Pre-CDM Acquisition Non-Predecessor" represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.

2. Represents the results of operations of the Partnership, which includes the USA Compression Predecessor, following the Transactions.

# .....Leading to Cash Flow and Asset Stability Through Cycles

Note: "2021" Represents Midpoint of 2021 Adjusted EBITDA guidance.

Source: EIA.

1. Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above under the heading "Pre-CDM Acquisition Non-Predecessor" represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.

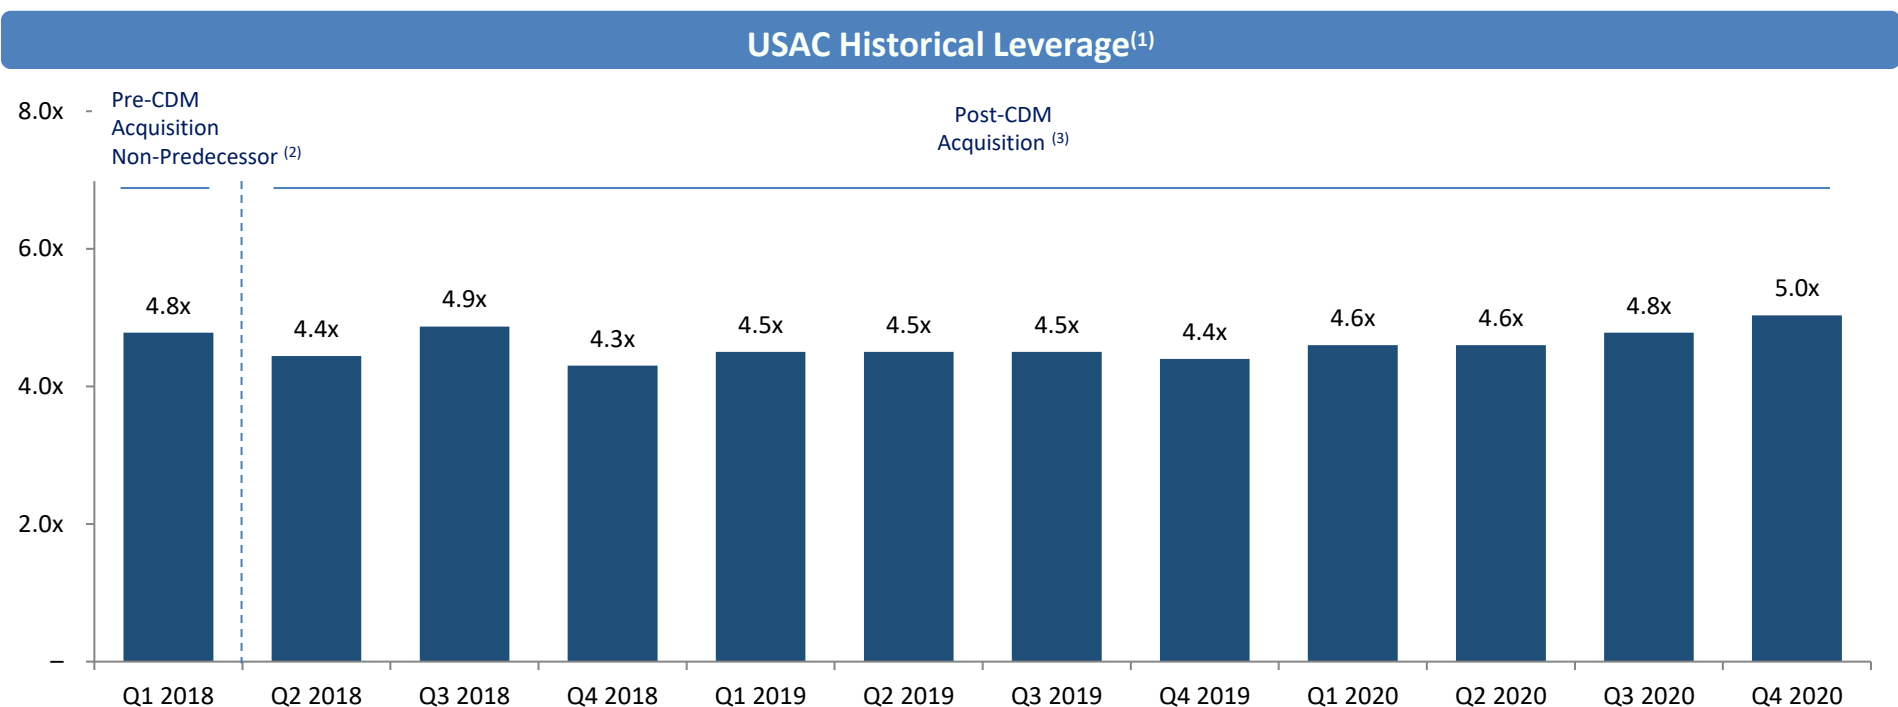

2. For 2018, represents the results of operations of the Partnership, which includes the results of operations of the USA Compression Predecessor for the three months ended March 31, 2018 and the results of operations of the Partnership, which includes the USA Compression Predecessor, for the nine months ended December 31, 2018.

# Leverage Reduction / Stability Over Time & Throughout Cycles

## USAC's Asset Base Supports Leverage Stability

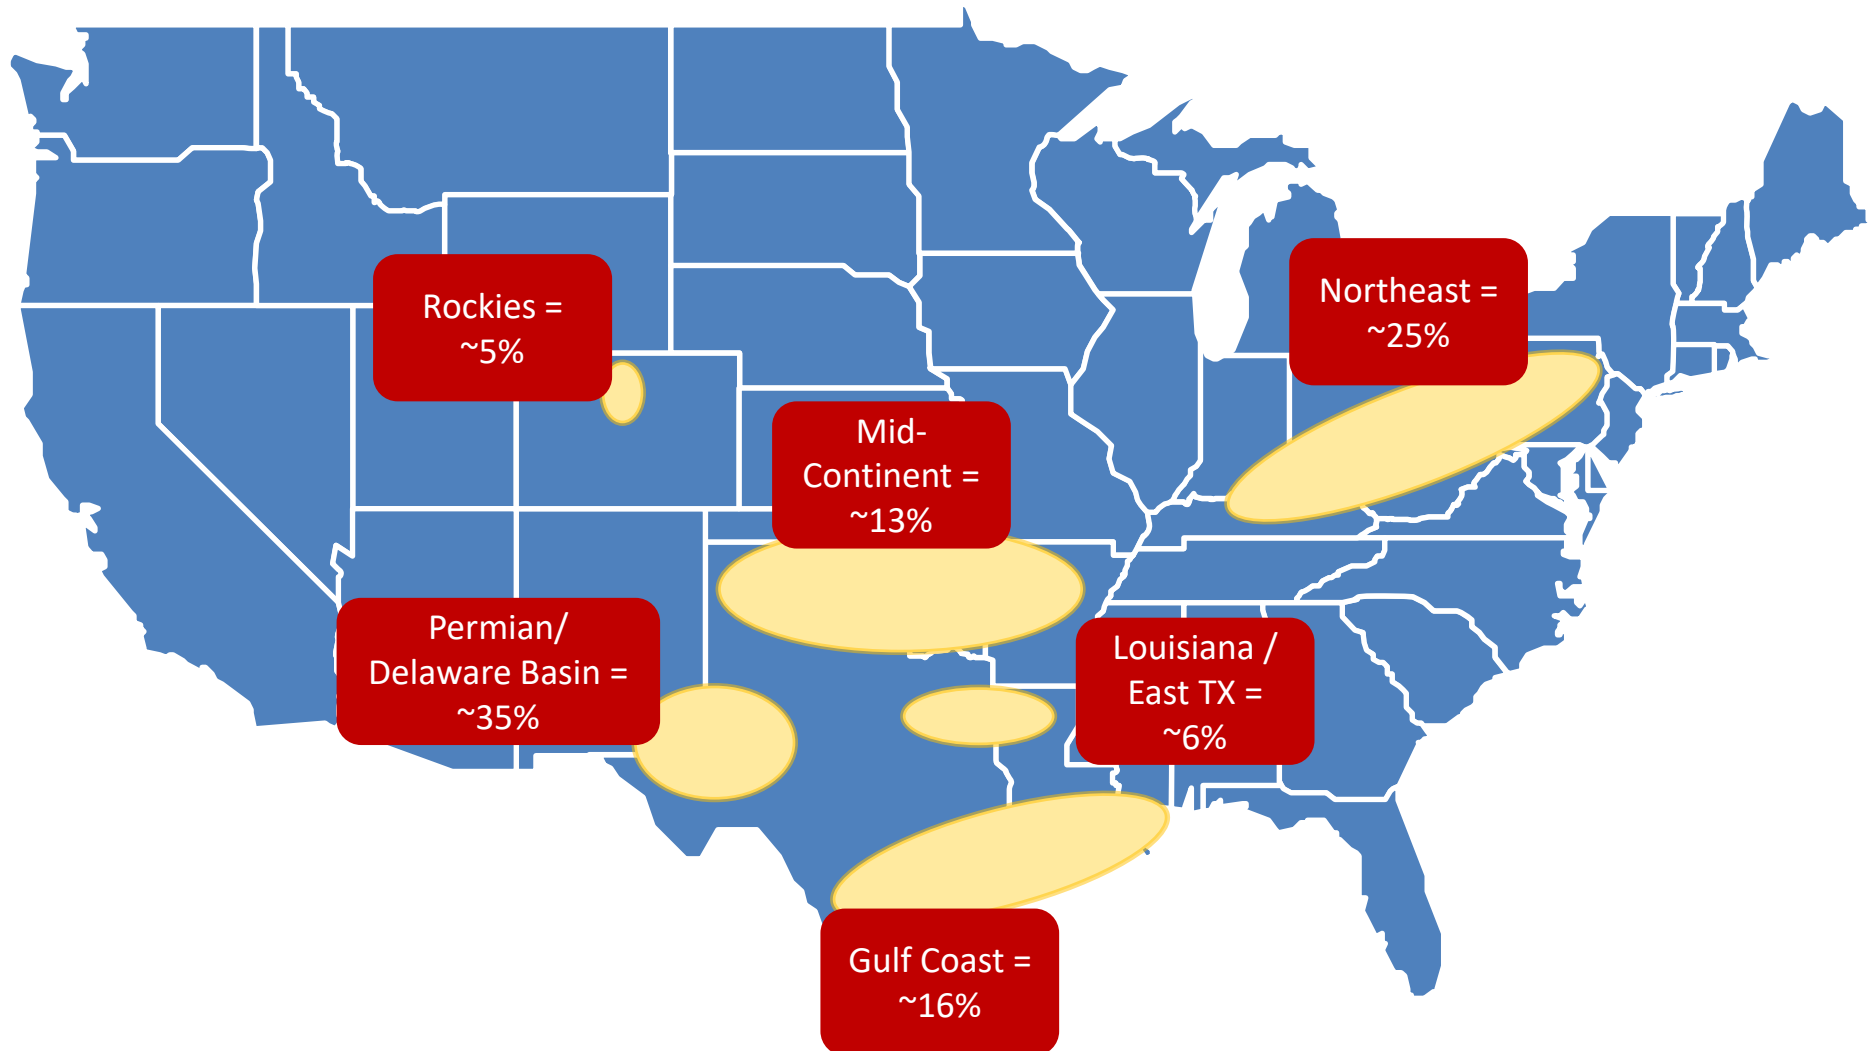

- As a public partnership, USAC has decreased leverage since being privately held
- Continued prudent management of leverage to suit business stability

1. Historical leverage calculated as total debt divided by annualized quarterly Adjusted EBITDA for the applicable quarter, in accordance with our current Credit Agreement. Actual historical leverage may differ based on certain adjustments.
2. Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above under the heading "Pre-CDM Acquisition Non-Predecessor" represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.
3. Represents the results of operations of the Partnership, which includes the USA Compression Predecessor, following the Transactions.

# Diversification – The “Right” Operating Regions

## Dry Gas Areas Have Seen Increased Activity Lately

*Note: Regional % breakdowns represent active fleet horsepower at December 31, 2020; excludes non-compression equipment.*

# Key Credit Highlights

## Focused Business Model

- 22+ year history focused on large HP applications using standardized, flexible equipment
- Compression services is substantially all we do; geographic diversity enhances business stability
- Fully-integrated CDM acquisition further strengthened asset base and customer exposure

## Stable Cash Flow Business

- Primarily fixed-fee contracts: no volumetric or commodity price-based revenue
- Larger HP applications generally result in longer-term contracts
- Barriers to exit result in asset “stickiness” in field

## Critical Natural Gas Infrastructure

- Natural gas isn’t going anywhere: clean-burning fuel of choice for the future
- Compressors are vital infrastructure that facilitate the movement of gas between regions
- Shale gas production requires multiples of compression HP vs conventional sources

## Strong Counterparties

- Diversified customer base comprised of leading industry participants
- Focus on large HP results in customers with size and scale to execute major projects
- Over 16 years, USAC has only written off ~\$3.0mm in bad debts (<0.08% of billed revenues)<sup>(1)</sup>

## Long-Lived, Economic Assets

- ~60% of the cost of a compression unit never wears out (skid, piping, vessels, etc.)
- Regular maintenance keeps assets running close to 24/7: runtime currently over 98%
- Periodic and predictable major overhauls “reset” engine life to zero hours

## Prudent Balance Sheet Management

- Focus on trending towards a long term total leverage target of low 4x
- Goal to balance LP unit distributions while also managing balance sheet with ample liquidity
- Reducing growth capex in times of industry moderation – 2021 total budgeted capex of ~\$57mm (down >50% vs '20, ~70% vs avg. of '18 – '20)

1. Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above for USAC represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.

# Natural Gas: Not Going Away!

---

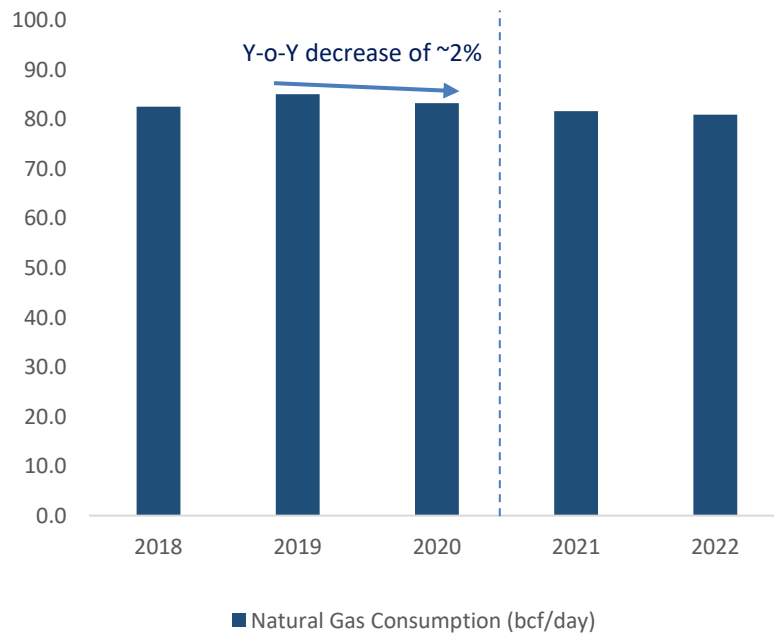

# Resilient US Natural Gas Demand in 2020

## 2020 Nat Gas Demand Off Slightly from 2019

- Natural gas continues to play an important role in the US & global economy
- Natural gas is a critical fuel for economy: power generation, industrial feedstock and residential/commercial demand = 90%+ of usage
- 2020 saw only a modest decrease in demand, in spite of COVID-19 impacts

US Natural Gas Consumption <sup>(1)</sup>

Consumption of Natural Gas in 2020 <sup>(1)</sup>

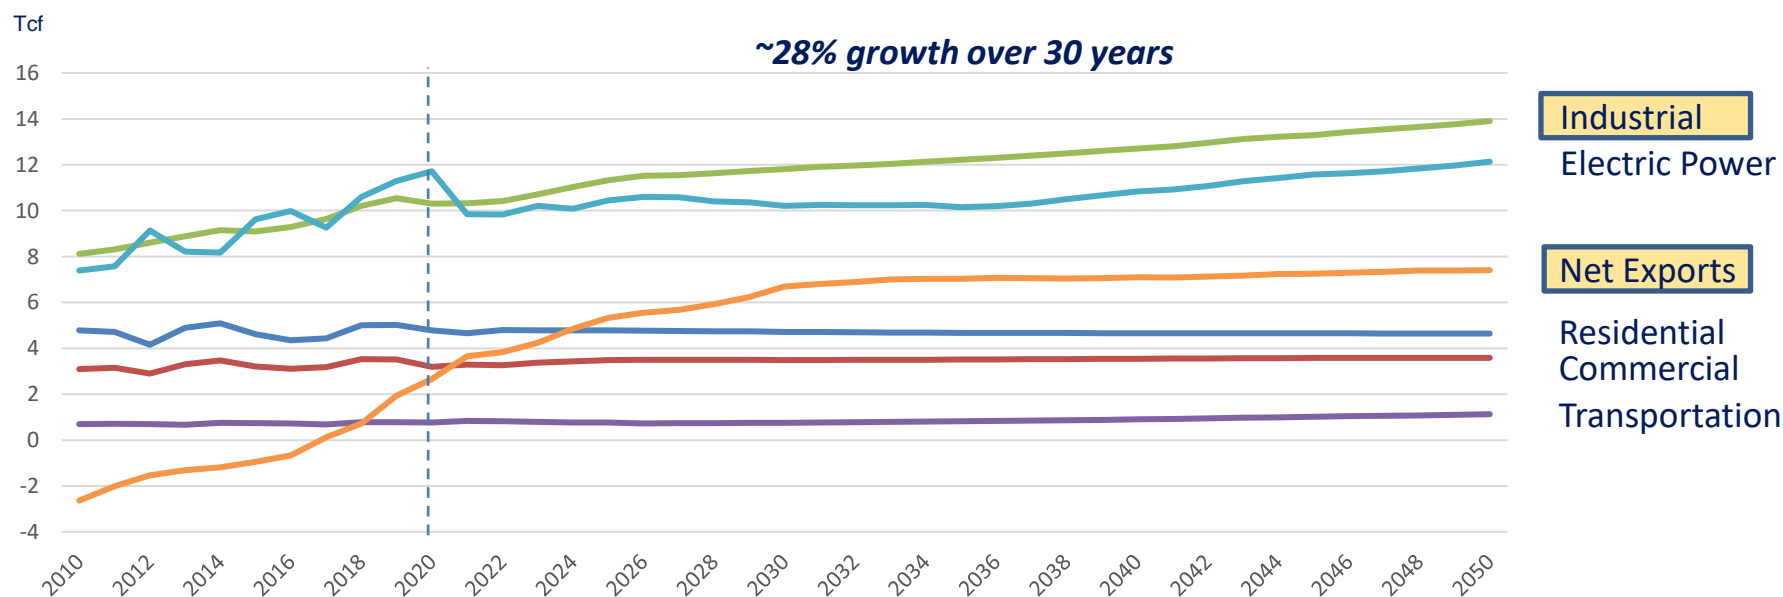

1. Source: EIA Short Term Energy Outlook, February 2021.

# Longer Term Natural Gas Demand Growing

## Driven by Industrial Use and LNG Exports

- Consumption growth between 2020 and 2050 concentrated in exports and industrial use:
  - Net exports (primarily LNG) add 4.7 Tcf/year by 2050
    - January 2021 saw record LNG volumes for 3<sup>rd</sup> consecutive month
  - Industrial uses add 3.6 Tcf/year by 2050
    - Economic growth driving increased industrial output (chemical industry) combined with ample supply

Annual US Natural Gas Consumption by Sector <sup>(1)</sup>

1. EIA Annual Energy Outlook February 2021.

# Natural Gas Remains Critical to US Electricity Production

## Renewables Becoming More Important, But Nat Gas Remains Vital for Electricity

- More electricity in the US is produced from natural gas than any other fuel
- Natural gas share projected to decline slightly, but remains critical for US electricity generation
- Natural gas-fired generators expected to represent 40% of power generation additions through 2050 <sup>(2)</sup>

US Electricity Generation by Fuel <sup>(1)</sup>

1. Source: EIA Short Term Energy Outlook, February 2021.

2. EIA Annual Energy Outlook February 2021.

# Natural Gas Production

## E&P Activity Pullback in 2020 Expected to Impact Near-Term Natural Gas Production

- Following COVID and OPEC actions in Spring 2020, E&P activity curtailment negatively affected gas volumes
  - Q2 2020 saw ~5% decline before stabilizing for remainder of the year
  - Forward years reflect increases in exports and industrial use
- After decreasing ~70% off pre-pandemic highs, total US rig count is up >60% from August lows <sup>(1)</sup>
  - Gas-directed rigs representing larger proportion of total (~25%) since Q2 2020, in part reflecting activity in Northeast and Haynesville
  - Drilling efficiencies and well characteristics expected to allow for continued production without moving back to historical rig count highs

US Natural Gas Withdrawals <sup>(2)</sup>

Domestic Rig Count <sup>(1)</sup>

# Appendix

---

# Organizational Chart

Note: Percentages reflect USAC unit count as of February 19, 2021.

# Large Horsepower Gas Applications Drive Stability

## Compression Unit Size Matters

USAC Focus:

Gas Compression Industry: Key Characteristics by Size

	Small - Medium	Large	X Large	XX Large	XXX Large	Commentary
Compression Unit HP Range	0 – 400 HP	400 – 1,000 HP	1,000 – 1,500 HP	1,500 – 2,300 HP	2,300 – 5,000+ HP	More horsepower needed to move larger gas volumes
Gas Vol (MMcf/d)	0.90	3.20	5.0	8.0	13.0	
Size (L x W x H, ft.)	21 x 12 x 11	33 x 19 x 16	38 x 27 x 20	43 x 34 x 20	80 x 17x 28	
Weight (lbs.)	~40,000	~85,000	~185,000	~250,000+	~400,000+	Increasing size, transportation & demobilization costs create <u>significant 'barriers to exit'</u>
Transportation Requirements	1 F350	2 x 18-wheelers	3 x 18-wheelers	5 x 18-wheelers	8 x 18-wheelers	
De-mobilization Costs (cust pays)	< \$10K	~\$25K	~\$60K	\$100K+	\$200K+	
Typical Contract Length	1 – 12 mos	6 months – 2 years	2 – 5 years	2 – 5 years	2 – 5 years +	Larger units = longer deployment

Note: Used CAT 3306TA, CAT 3508TALE, CAT 3516BLE, CAT 3606TALE and CAT 3608TALE as representative units for Small - Medium, Large, X Large, XX Large and XXX Large horsepower categories, respectively. Gas volumes based on 50 psi suction pressure and 1,200 psi discharge pressure.

# Balancing Distribution Stability and Leverage

## Annualized Distributions per Common Unit

## USAC Historical Leverage<sup>(3)</sup>

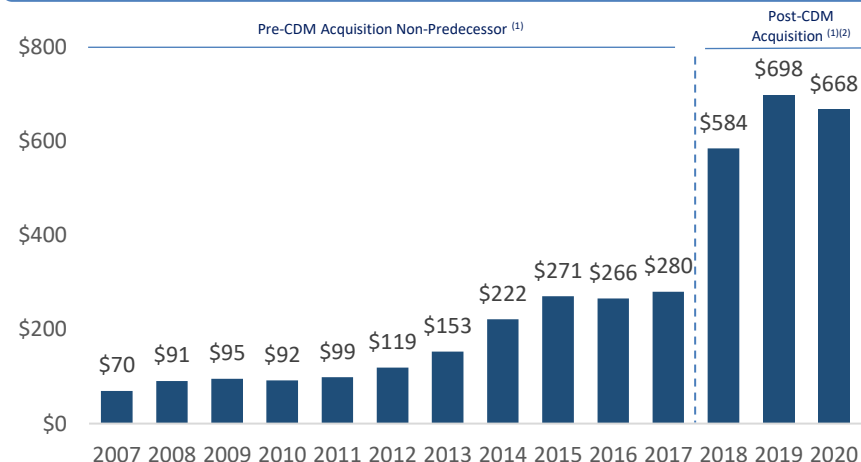

- Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above under the heading "Pre-CDM Acquisition Non-Predecessor" represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.
- The USA Compression Predecessor did not pay distributions prior to the completion of the Transactions.
- Historical leverage calculated as total debt divided by annualized quarterly Adjusted EBITDA for the applicable quarter, in accordance with our current Credit Agreement. Actual historical leverage may differ based on certain adjustments.
- Represents the results of operations of the Partnership, which includes the USA Compression Predecessor, following the Transactions.

# Operational and Financial Performance

## Avg. Revenue Generating HP (000s)

## Revenue (\$MM)

## Total Capex (\$MM)

## Adjusted EBITDA (\$MM) & Margin Percentage<sup>(3)</sup>

Note: 2021 refers to 2021 Guidance midpoints.

1. Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above under the heading "Pre-CDM Acquisition Non-Predecessor" represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.

2. For 2018, represents the results of operations of the Partnership, which includes the results of operations of the USA Compression Predecessor for the three months ended March 31, 2018 and the results of operations of the Partnership, which includes the USA Compression Predecessor, for the nine months ended December 31, 2018.

3. See "Basis of Presentation; Explanation of Non-GAAP Financial Measures" for information on calculations of Adjusted EBITDA and Adjusted EBITDA Margin Percentage.

# Macro Thesis: The “Shift to Shale”

## Shale Gas Expected to Continue to be the Primary Source of US Natural Gas

- **Shale Dominance:** Production from shale shadows all other sources
  - 2020 est. ~29 Tcfe of shale / tight gas production (86% of total); growing to 92% by 2050
- **Pie Getting Bigger:** EIA projecting ~43 Tcfe of total production by 2050

- Shale gas is typically produced at lower wellhead pressures (0-50 PSIG) in contrast to conventional gas wells (100-300 PSIG)
- Pipeline specifications remain constant – requiring gas pressure to be increased significantly to move gas into and through pipelines
- As a result, to move the same amount of gas requires significantly more compression

Natural Gas Production by Type <sup>(1)</sup>

Source: U.S. Energy Information Administration, Annual Energy Outlook 2021.

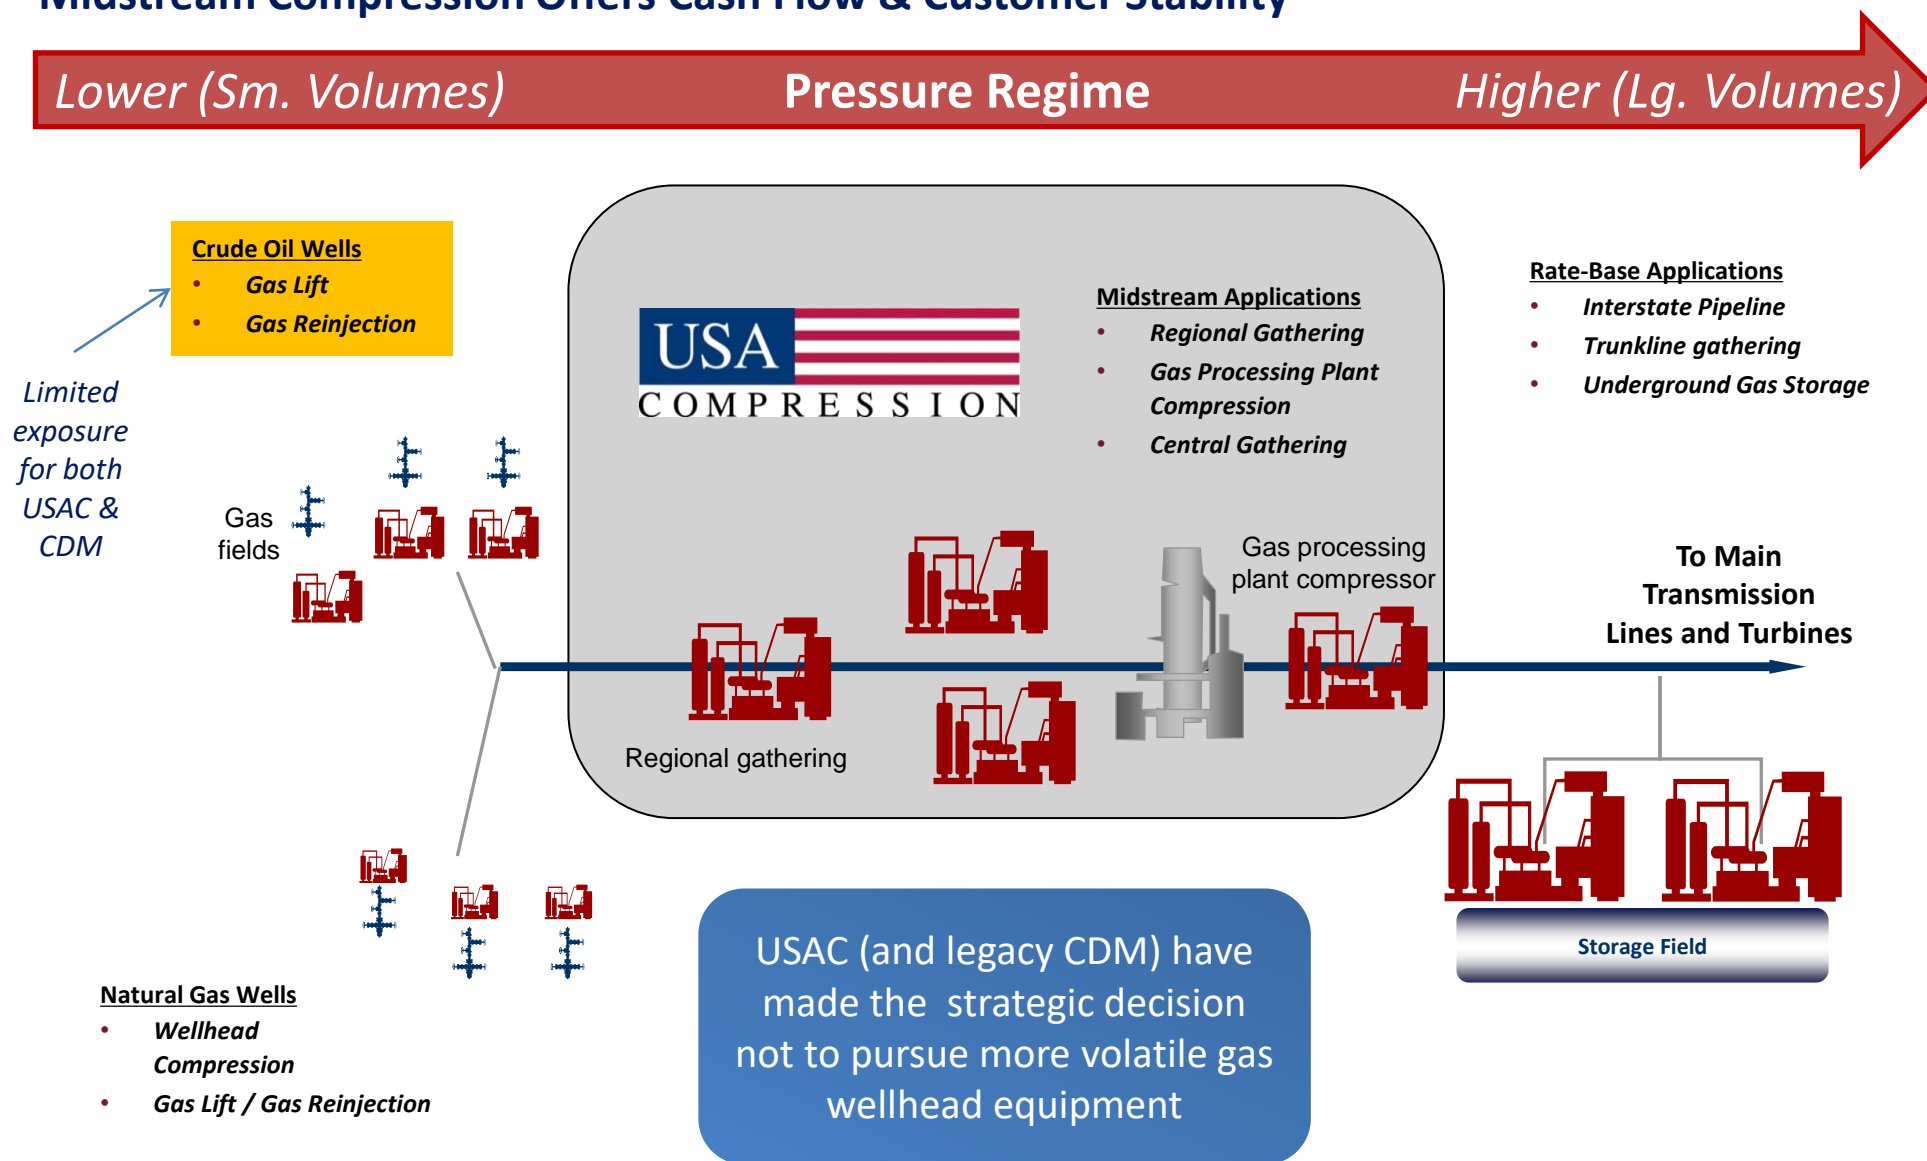

Shale Production Drives Increasing Compression Requirements <sup>(1)</sup>

Source: Ariel Corporation: compressor sizing protocol.  
(1) Assumes Discharge Pressure = 1,200 PSIG.

# Compression Throughout the Value Chain

Notes: Represents the results of operations of the USA Compression Predecessor only for the three months ended March 31, 2018 and the results of operations of the Partnership, which includes the USA Compression Predecessor, for the nine months ended December 31, 2018. See Slide 2 for more detail.

Following the Transactions, the USA Compression Predecessor has been determined to be the historical predecessor of the Partnership for financial reporting purposes. The information presented above under the heading "Pre-CDM Acquisition Non-Predecessor" represents information of USA Compression Partners, LP, which is not the predecessor of the Partnership, for periods prior to the Transactions and is presented for illustrative purposes only. See Slide 2 for more detail.

## 2021 Guidance

Net income	\$0.0 to \$20.0 million
Plus: Interest expense, net	130.0 million
Plus: Depreciation and amortization	241.0 million
Plus: Income tax expense	1.0 million
EBITDA	<u>\$372.0 million to \$392.0 million</u>
Plus: Unit-based compensation expense	13.0 million
Adjusted EBITDA	<u>\$385.0 million to \$405.0 million</u>
Less: Cash interest expense	120.5 million
Less: Current income tax expense	0.5 million
Less: Maintenance capital expenditures	22.0 million
Less: Distributions on Preferred Units	49.0 million
Distributable Cash Flow	<u><u>\$193.0 million to \$213.0 million</u></u>

# Basis of Presentation; Explanation of Non-GAAP Financial Measures

---

This presentation includes the non-GAAP financial measures of Adjusted gross margin, Adjusted EBITDA, Distributable Cash Flow and Distributable Cash Flow Coverage Ratio.

EBITDA, a measure not defined under U.S. generally accepted accounting principles (“GAAP”), is defined by USAC as net income (loss) before net interest expense, depreciation and amortization expense, and income tax expense (benefit). Adjusted EBITDA, which also is a non-GAAP measure, is defined by USAC as EBITDA plus impairment of compression equipment, impairment of goodwill, interest income on capital lease, unit-based compensation expense, restructuring/severance charges, management fees, expenses under our operating lease with Caterpillar, certain transaction fees, loss (gain) on disposition of assets and other. The Partnership’s management views Adjusted EBITDA as one of its primary tools, to assess: (1) the financial performance of the Partnership’s assets without regard to the impact of financing methods, capital structure or historical cost basis of the Partnership’s assets; (2) the viability of capital expenditure projects and the overall rates of return on alternative investment opportunities; (3) the ability of the Partnership’s assets to generate cash sufficient to make debt payments and pay distributions; and (4) the Partnership’s operating performance as compared to those of other companies in its industry without regard to the impact of financing methods and capital structure. The Partnership believes that Adjusted EBITDA provides useful information to investors because, when viewed with GAAP results and the accompanying reconciliations, it provides a more complete understanding of the Partnership’s performance than GAAP results alone. Management also believes that external users of its financial statements benefit from having access to the same financial measures that management uses in evaluating the results of the Partnership’s business.

Adjusted gross margin, a non-GAAP measure, is defined as revenue less cost of operations, exclusive of depreciation and amortization expense. Management believes that Adjusted gross margin is useful as a supplemental measure of the Partnership’s operating profitability. Adjusted gross margin is impacted primarily by the pricing trends for service operations and cost of operations, including labor rates for service technicians, volume and per unit costs for lubricant oils, quantity and pricing of routine preventative maintenance on compression units and property tax rates on compression units.

Distributable Cash Flow, a non-GAAP measure, is defined as net income (loss) plus non-cash interest expense, non-cash income tax expense (benefit), depreciation and amortization expense, unit-based compensation expense, impairment of compression equipment, impairment of goodwill, certain transaction fees, severance charges, loss (gain) on disposition of assets, proceeds from insurance recovery and other, less distributions on the Partnership’s Series A Preferred Units (“Preferred Units”) and maintenance capital expenditures. The Partnership’s management believes Distributable Cash Flow is an important measure of operating performance because it allows management, investors and others to compare basic cash flows the Partnership generates (after distributions on the Partnership’s Preferred Units but prior to any retained cash reserves by the Partnership’s general partner and the effect of the Distribution Reinvestment Plan (“DRIP”)) to the cash distributions the Partnership expects to pay its common unitholders. See previous slides for Adjusted EBITDA reconciled to net income (loss) and net cash provided by operating activities, and net income (loss) reconciled to Distributable Cash Flow.

This presentation contains a forward-looking estimate of Adjusted EBITDA and Distributable Cash Flow projected to be generated by the Partnership in its 2021 fiscal year. A forward-looking estimate of net cash provided by operating activities and reconciliations of the forward-looking estimates of Adjusted EBITDA and Distributable Cash Flow to net cash provided by operating activities are not provided because the items necessary to estimate net cash provided by operating activities, in particular the change in operating assets and liabilities, are not accessible or estimable at this time. The Partnership does not anticipate the changes in operating assets and liabilities to be material, but changes in accounts receivable, accounts payable, accrued liabilities and deferred revenue could be significant, such that the amount of net cash provided by operating activities would vary substantially from the amount of projected Adjusted EBITDA and Distributable Cash Flow.

Adjusted EBITDA, Adjusted gross margin and Distributable Cash Flow should not be considered an alternative to, or more meaningful than, net income (loss), operating income, cash flows from operating activities or any other measure of financial performance presented in accordance with GAAP as measures of operating performance and liquidity. Moreover, Adjusted EBITDA, Adjusted gross margin and Distributable Cash Flow as presented may not be comparable to similarly titled measures of other companies because other entities may not calculate such measures in the same manner.

The Partnership believes that external users of its financial statements benefit from having access to the same financial measures that management uses in evaluating the results of the Partnership’s business.

Distributable Cash Flow Coverage Ratio, a non-GAAP measure, is defined as Distributable Cash Flow divided by distributions declared to common unitholders in respect of such period. We believe Distributable Cash Flow Coverage Ratio is an important measure of operating performance because it allows management, investors and others to gauge our ability to pay cash distributions to common unitholders using the cash flows we generate. Our Distributable Cash Flow Coverage Ratio as presented may not be comparable to similarly titled measures of other companies.
